The colours seen in this brochure are for demonstration purposes only. We have an extensive in-house database of over 15,000 colours available to choose from. Also available is a free in-house colour matching service, upon request. Please note that colour matches can take up to 5 working days from when we receive the sample

Introducing the unique AVKOTE GP glass coatings range. All the finishes are available in a range of colours, using high quality pigments, making it an unrivalled market leader. AVKO is the only supplier of this product in the UK.

How to order

1) Select your chosen finish and a colour of your choice. When ordering, please specify the type of finish/product (e.g. GP, Pearl, Metallic 91 etc.) along with the colour you require this in (e.g. RAL 3002). Please note that our metallic finish bases (91, 92 & 93) are silver, so this reduces the amount of colours available.

2) When ordering the translucent finishes, please remember to specify the colour percentage required (2%, 4% or 6%). If you require the fine or coarse frosted finishes with colour, please let us know if you would like 5% or 10%.

3) If you need any help or advice with the application of any of these products, please do not hesitate to contact us.

1. Fine frosted – Fine sandblasted effect
